

# Ultra Aluminum™ Specialty Post Flanges are Designed for Strength, Versatility and Innovation.

Ultra Aluminum™ helps tap into your desire to explore some exciting new railing designs and configurations. We've developed a series of flange extensions to allow your railing to 'float' outside of the surface of your balcony, porch or decking. There are different flanges for inside and outside corners as well as support brackets for bottom rails.

### 2" Stub Mount

A very substantial 12" tall aluminum extrusion with an outer dimensions of 2" to fit a 2.5" boss.

### X-Spline Stub Mount

1.75" outside dimensions to fit a 2" post.

Before Concrete

After Concrete

We've also developed two different surface-mounted stub mounts to be built into the substructure of a concrete porch or balcony.
